1. Release Overview

Artemis Views Standard 2017.1 release is focused primarily on issues reported by customers.

Release Version	Artemis Views Standard 2017.1
Release Date	April 14, 2017
Release Type	Generally Availability
Deliverables	Product Release Software and Release Documentation

2. What's new in this release

Performance

Product binaries build with latest version of compilers to provide better performance.

3. Upgrade Instructions

3.1. Application Upgrade

Please read the document "AV_ClientServer_Installation_Manual.pdf" before commencing with the installation process. The installation manual can be found on the Views install CD at the following location:

\\Artemis ClientServer Components\Views Components\Docs\install

A notable update to the install manual is found in the CostView job server section. In particular, updates to the CostView job server parameter file (cvserver.ini) are described on pages 59 and 60. The updates are important to understand and implement because they have an impact on all CostView job server instances, specifically job servers configured to support multiple datasets.

3.2. Database Upgrade

Please read the document "dbchange.pdf" before starting with the installation process. This document provides information on database script changes that impact this release. The document can be found on the Views install CD's at the following location:

\\Artemis ClientServer Components\Views Components\Docs\readmes

4. Known Issues

- 1) **VIEWSCID-1527** - MSPClient - Global.mpt files for different languages to support MSP 2007.

Additional Information: Global.mpt files for all supported languages are now available for MSP 2007. Users can get these files from Installation disk

<CD Image>\Artemis ClientServer Components\Views MspClient\Miscellaneous\Global MPT\ and copy it to MSPClient installation folder (for example C:\Program Files\Artemis MspClient\).

Ex: English language global.mpt file for MSP 2007 can be downloaded from

<CD Image>\Artemis ClientServer Components\Views MspClient\Miscellaneous\Global MPT\Global EN\MSP 2007\.

- 2) **VIEWSCID-3022** – MSPC/BCE - Saving updated values unsuccessful and results in different values for %Complete and Remaining Duration in HAMMOCK activities between MSPC and BCE.

Workaround: To obtain correct %Complete and Remaining Duration values for the in-progress Hammock activity when saved to ProjectView, you must run Time Scheduling.

- 3) **VIEWSCID-4118** – ProjectView - Changing Earned Value Method in a 1 to 1 project should be successful and the field should be editable provided the corresponding activity has not started.

Workaround: Issue can be resolved by deleting the activity and then adding it back.

- 4) **VIEWSCID-4142** – CostView, Security Manager - CostView crashes when Security Manager is left open and CostView is opened.

Workaround: Close Security Manager before running CostView.

- 5) **VIEWSCID-4859** – ProjectView - ProjectView application crashes when a user with the characters "TEST" tries to access the workbook via BCE.

Workaround: Avoid using users with "TEST" until a patch is available for the same.

6) Graphics Publisher and PlotView reports in Project View fail to launch.

Workaround: This issue exists on Windows 2003 and Windows 2008 server machines. To resolve it Turn on "Data Execution Prevention (DEP)" for essential Windows programs and services only.

My Computer -> System Properties -> Advanced tab -> Performance Settings -> Data Execution Prevention -> Select the option "Turn on Data Execution Prevention (DEP) for essential Windows programs and services only"

System restart is required after the change.

5. Supported Platforms

ProjectView and CostView

Platform	Version
Operating System	Windows 7 R2, Windows8
.Net Framework	4.0
Database	Oracle 12c with 32-bit 11g Oracle client, SQL Server 2008, SQL Server 2012

Artemis Project Management (APM) and Web TrackView (Web TV)

Platform	Version
Operating System	Linux Red Hat Enterprise 6, Windows 2008 Server R2, Windows 2012 Server
JDK Version	1.7.0_51, 1.8.0_45
Database	Oracle 12c, SQL Server 2008, SQL Server 2012
Application Server	Weblogic 12.1.1(c), WebSphere 8.5.5.3, Tomcat 7, IIS7.5 with ServletExec
JDBC Drivers (Type 4)	Oracle JDBC native driver, SQL Server JDBC native driver
Browser	IE11, Firefox ESR 31.5.0, Google Chrome 40, Safari 6.2 (Mobile TrackView)
Report Export Format	Acrobat Reader 8.1 and 11, Microsoft Excel (macros is not supported) 2010 and 2013.

MSP Client

Platform	Version
Operating System	Windows 7 R2, Windows 8
.Net Framework	4.0
Database	MSP 2007 (32-bit)

Job Server

Platform	Version
Operating System	Windows 2008 Server R2
